

PHYSTEP

DURABILITY

Durability of Phystep is expected to be around 15 - 20 manual taping sessions.

This equals around 100 days of **NON-STOP** using.

Just like kinesiological tapes, Phystep will start wearing off with time since the tapes are under high pressure constantly.

Under normal using conditions and correct washing, **Phystep lasts for around 4 - 6 months.**

When the tapes are starting to wear off, it is still possible to use Phystep leggings for up to 2 - 3 months.

Even when tapes are wearing off, just like standard kinesiological tapes, they will still function for some time!
